

Heritage Hero

A paragraph detailing the purpose and target audience for your website.

Heritage Hero is the first crowdfunding platform focusing on preserving heritage building in Australia.

Most heritage buildings are not financially sustainable for investors but it is an important part of history which we need to protect. Foundation, association, individuals or government entities can create projects and invite anyone to contribute.

The features your MVP will include:

- Create a project (Project name, summary, full description (What type of building, why, what will we use the fund for, amount, select a category, duration of the campaign, images or video, who we are, link to media, perks against donations, contact details)
- Log in/out to manage project (Profile photo, contact details, update project)
- Search bar for project
- Ability to contribute to a project
- Show the progress for the campaign and the number of days left

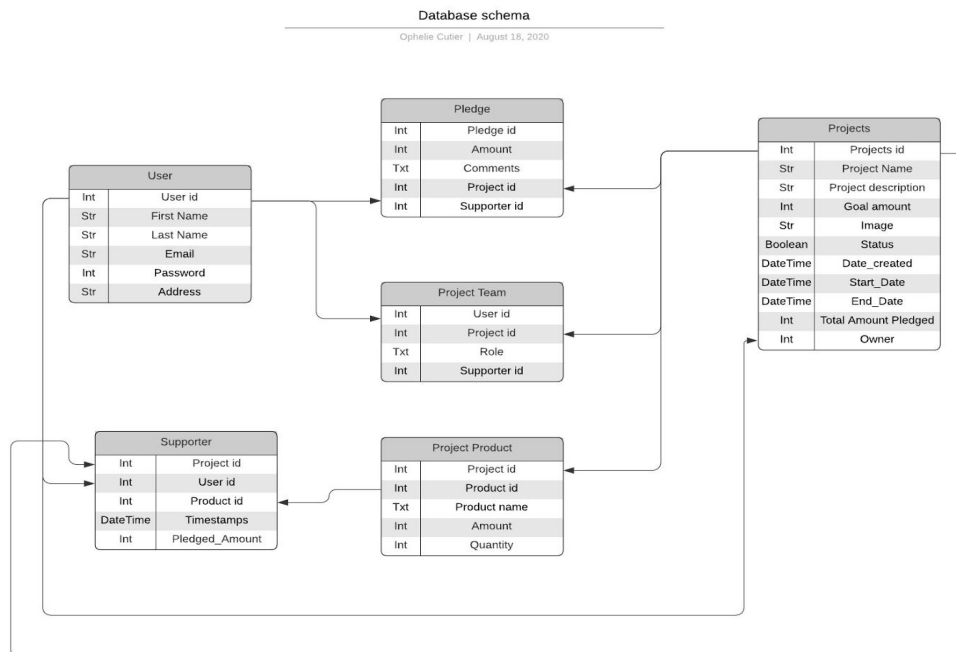

At least 3 additional features you would like to include if you reach your MVP.

- Filter to search project (by category, status: Successful, Unsuccessful, Open)
- Visible list of contributors
- Comments for each campaign
- Post news on the campaign page

An API specification:
